software developer

full-time or part-time

The company

Lexical Computing, founded in 2003, is a leading solution provider in the field of natural language processing and computational linguistics. Its main product **Sketch Engine** hosts more than 500 text corpora in over 100 languages. These multi-billion-word databases are used by IT companies, universities, national language institutes and publishing houses around the world to explore how language is used.

The job

We are looking for an **software developer** to join our team and help us expand further: more data in more languages together with better tools for processing them while maintaining simple, scalable and language-independent solutions. The position is full-time or part-time, based in **Brno, Czech Republic**.

Skills and qualifications

- good programming skills
- readiness to learn new things and adopt new way of thinking
- basic understanding of how the modern web works (HTML/JS/CSS, communication protocols)
- user-level familiarity with Linux and shell scripting
- any NLP education is an advantage but not a must
- working proficiency in English
