

"april" "fools" ""? "day"

Default attribute:

Punctuation marks are not words but are tokens. To find April Fools' Day, criteria for 4 tokens are needed. The third token is optional.

lc stands for lowercase, it is used for case insensitive searching, it behaves as if the whole corpus was converted to lowercase for the purpose of searching.

Setting the default attribute to **lc** simplifies the query which would otherwise look like this:
[lc="april"] [lc="fools"] [lc=""]? [lc="day"]

lc will be assigned to each token which does not have an explicitly set attribute.

If you 've ever been pranked on from the old ' calendar year ' date of newspaper claimed that it was only an about 350 from the start of 2008 till Oh yeah! Happy I recommend you stay away from it. There is no better date to release it than its only a rumor .. most likely an

April Fools ' Day
April Fools day
April fools day
april fools day
APRIL FOOLS DAY
April Fools Day
april fools day
APRIL FOOLS DAY

, you may wonder how this. , before transitioning to the normal date of prank . The article contained many details the next year (2009) and from then till now !!!! For more April Fools Day fun is always a laugh. , think about it. joke since its gonna appear in an april month

APRIL | 2018
