SKETCH ENGINE

system administrator

part-time

The company

Lexical Computing, founded in 2003, is a leading solution provider in the field of natural language processing and computational linguistics. Its main product **Sketch Engine** hosts more than 500 text corpora in over 100 languages. These multi-billion-word databases are used by IT companies, universities, national language institutes and publishing houses around the world to explore how language is used.

The job

We are looking for a **Linux system administrator** to join our team that is responsible for an infrastructure that backs our system where users search around 500 TB data online and will contribute to the development of the whole cluster of services that we provide. The position is part-time with prospects of becoming full time. It is based in **Brno, Czechia.**

Skills and qualifications

- very good knowledge of Linux, preferably Fedora/CentOS/RHEL
- readiness to learn new things and adopt new way of thinking
- basic programming skills (Bash, Python, C)
- any NLP education is an advantage but not a must
- working proficiency in English
